

Science at Greasy Infant School

Autumn Term

Foundation 2	Year One	Year Two
		
		

Foundation 2

In F2 the children have been looking at the seasons and the signs of Autumn. They been for an Autumn walk in our school grounds and collected leaves and brought in conkers. They have linked this to their continuous provision activities and used the natural items collected to create brilliant pictures.

Year 1

In year one the children have been learning all about humans! They have been learning about the parts of the body and have completed some labelling activities. They have also been learning about the five senses and the body part associated with each sense. They have carried out some simple investigations linked to hearing and smelling.

Year 2

In year two the children have been learning about the life cycles of humans and a variety of other amazing animals! They have revisited animal groups (birds, mammals, amphibians, reptiles, fish, insects) and listed different animals for each one. They have demonstrated their understanding of life cycles in diagrams and written work.
