

## Science in our school

### Year One - Autumn Term 2021

This term in Year One the children have been learning about the human body and have been labelling the main body parts.

The children have been linking their work on the human body to the five senses.

They have been investigating how the senses work by identifying different sounds and smells which they enjoyed very much!

Finally, the children have started to think about seasonal change and have looked at signs of Autumn.
